PROJECT

Real estate service platform

Personal Frontend Project– [GitHub Repository](#)
Developing a real estate platform that supports listing properties for sale, searching for properties, and interaction between customers and listing owners. Building a user-friendly, responsive interface and integrating APIs for real-time real estate data management.
Technologies used: React.js, Vite, Node.js, RESTful API

Food platform

Course Project | Full Stack Development – [GitHub Repository](#)
Multilingual food platform supporting ordering and customer interaction
Technologies used: Next.js, NestJS, Node.js, MongoDB, RESTful API

Online table reservation and ordering system for restaurants.

Course Project | Full Stack Development – [GitHub Repository](#)
A food ordering platform for restaurants, supporting online table reservations and ordering at the table.
Technologies used: React.js, Vite, NestJS, Node.js, MySQL, RESTful API

Supermarket management system

Course Project | Frontend Development – [GitHub Repository](#)
Develop a sales management system interface based on a mini-supermarket model similar to Bach Hoa Xanh (a Vietnamese grocery store chain), supporting product management, order management, and sales operations.
Technologies used: React.js, Vite, RESTful API

EDUCATION

Saigon University (2022-2027)
Ho Chi Minh , Viet Nam

CyberSoft Academy (2022-2023)
Completed the full-stack web developer course.

ACHIEVEMENTS

Completed the Full Stack Web Development course at Cybersoft.
Received an Honorable Mention at the Hackathon competition held on November 8, 2025 at Saigon University.

CERTIFICATIONS AND LICENSES

I have completed the Full Stack Web Development course at Cybersoft Programming Training Center.
